Subject Index
Canadian Journal of Soil Science, Volume 90, 2010

Acid soil
  livestock manure improves acid and soil productivity, 685
Agitation
  emissions from liquid dairy manure, 229
Agrichemical
  crack flow in Canadian soils, 129
Agroecosystem experiment, long-term
  soil organic carbon in Canada, 543
Alfalfa
  soil response to transplanted alfalfa, 523
Alkaline residuals
  paper mill and lime effects on soil P fractions, 467
Alkalinity
  saline sites supporting boreal mixedwood forests, 1
Ammonia emission
  emissions from liquid dairy manure, 229
Ammonium
  fertilisation azotée du bleuet nain, 189
Anistropy
  anistropy of layered unsaturated soils, 319
Application timing
  effects of application timing and soil type on manure N fate, 55
Arbuscular mycorrhizal fungi
  glomalin in soilless pot culture, 567
Artificial neural model
  soil organic C distribution maps, 75
Ash, wood
  paper mill and lime effects on soil P fractions, 467
Atmospheric deposition
  Ca nutrition in a boreal shield forest, 267
Azote
  fertilisation azotée du bleuet nain, 189

Bacteria
  biosolids and fertilizer impacts on tailing properties, 571
  soil bacteria involved in residue decomposition, 289
  survival of *E. coli* in agricultural soil, 495
Bark
  aeration limitation in bark/peat growing media, 481
Barley
  livestock manure improves acid and soil productivity, 685
Best management practices
  nutrient enrichmnent by cattle watering sites, 331
Biological soil crust
  supraglaical tephra-derived soils, Yukon Territory, 611
Bleuet
  fertilisation azotée du bleuet nain, 189
Boreal Cordillera
  boreal grassland soils, northwestern Canada, 89
Boreal forest (see Forest, boreal)
Bradford reactive soil protein
  glomalin in soilless pot culture, 567
Brassisa napus (see Canola)
  salinity tolerance of camelina compared with canola, 151

Cadmium
  paper mill biosolids in silage corn, 215
Calcium
  limestone, Mn and Zn affects cauliflower, 177
Calcium cycling
  Ca nutrition in a boreal shield forest, 267
Camelina sativa
  salinity tolerance of camelina compared with canola, 151
Canola
  livestock manure improves acid and soil productivity, 685
  salinity tolerance of camelina compared with canola, 151
Capillary, pressure-dependent anistropy
  anistropy of layered unsaturated soils, 319
Carbon dioxide
  estimation of daily soil CO_2 flux, 517
  mudboil carbon fluxes, 441
Carbon mineralization
  mineralization of active soil organic carbon, 551
Carbon, organic
  C and N in forest plantations, 27
  organic carbon quality in two contrasting soils, 15
  soil organic carbon in Canada, 543
Carbon sequestration
  C sequestration rates and translocation rates, 295
  soil response to transplanted alfalfa, 523
Cement kiln dust
  cement kiln dust surface application, 201
Cereal yield
  agronomic application of manure and compost, 619
Chernozem
  boreal grassland soils, northwestern Canada, 89
  soil characteristics and groundwater, 597
Chronosequence
  soil development rates in sandy temperate soils, 295
Clam processing wastes
  properties of clam processing wastes, 649
Classification
  boreal grassland soils, northwestern Canada, 89
Clay
  nitrogen speciation in clay fractions, 309
  soil volume changes, 389
Compaction
  soil properties of the Yungas/Chaco forest, 679
Compost
  agronomic application of manure and compost, 619
  biowaste for soil erosion control, 103

Composted manure
soil nutrients under fresh and composted manure, 341
Contamination
limestone effect on soil elements, 655
nitrate-N in the soil profile, 429
transport, crack flow in Canadian soils, 129
Corn
paper mill biosolids in silage corn, 215
Cover, soil
salinization of soils over oil sand spoil, 637
soil properties of the Yungas/Chaco forest, 679
Crop residue
soil bacteria involved in residue decomposition, 289
Cross validation
Canadian agricultural ecodistrict climate database, 373

Debris, supraglacial
supraglaical tephra-derived soils, Yukon Territory, 611
Decision Support System for Agrotechnology Transfer-Cropping System Model
improving soil moisture prediction, 37
Development rates, soil
soil development rates in sandy temperate soils, 295
Digital evaluation model
soil organic C distribution maps, 75
Dryland farming
nitrate-N in the soil profile, 429

Ecodistrict
Canadian agricultural ecodistrict climate database, 373
Electrical conductivity
saline sites supporting boreal mixedwood forests, 1
Envelope-pressure potenials
hydrostatics of frozen soil, 403
Erosion
biowaste for soil erosion control, 103
calibration and validation of the Modified Universal Soil Loss Equation, 585
Escherichia coli
survival of *E. coli* in agricultural soil, 495
Euphorbia pulcherima
aeration limitation in bark/peat growing media, 481
Evapotranspiration
modelling soil water content, 527

Fallow
soil organic carbon in Canada, 543
False flax
salinity tolerance of camelina compared with canola, 151
Fertility
soil fertility of organically managed fields, 667
First-order decay model
mineralization of active soil organic carbon, 551
Forage
cement kiln dust surface application, 201
Forest, boreal
boreal grassland soils, northwestern Canada, 89
Ca nutrition in a boreal shield forest, 267
nitrogen availability from peat amendments, 165
saline sites supporting boreal mixedwood forests, 1
soil physical properties and planted Scots pine, 451
tree influence on soil organic C and C:N, 559
Forest floor
supraglaical tephra-derived soils, Yukon Territory, 611
Forest grazing
soil properties of the Yungas/Chaco forest, 679
Forest management
C and N in forest plantations, 27
Forest soil
Ca nutrition in a boreal shield forest, 267
soil physical properties and planted Scots pine, 451
soil properties of the Yungas/Chaco forest, 679
Fractionnement de la fertilisation
fertilisation azotée du bleuet nain, 189
Freeze-thaw cycles
N_2O fluxes related to soil freeze and thaw periods, 409
soil P availability and freeze/thaw cycles, 419
Freezing of soil
hydrostatics of frozen soil, 403
soil volume changes, 389
Frost potentials
hydrostatics of frozen soil, 403
Fungi, arbuscular mycorrhizal
glomalin in soilless pot culture, 567

Gas diffusion
aeration limitation in bark/peat growing media, 481
Gas, dissolved
emissions from liquid dairy manure, 229
Genesis, soil
boreal grassland soils, northwestern Canada, 89
soil characteristics and groundwater, 597
Global warming
soil P availability and freeze/thaw cycles, 419
Glomalin
glomalin in soilless pot culture, 567
Grassland
boreal grassland soils, northwestern Canada, 89
Gray Luvisol
effects of controlled-release urea, 363
Greenhouse gas
emissions from liquid dairy manure, 229
greenhouse gas emission from a prairie pothole landscape, 243
modeling methane emissions from stored manure, 507
Groundwater
nitrate-N in the soil profile, 429
survival of *E. coli* in agricultural soil, 495
Groundwater flow
soil characteristics and groundwater, 597

Heat pulse probes
N_2O fluxes related to soil freeze and thaw periods, 409

Heavy metal
paper mill biosolids in silage corn, 215
properties of clam processing wastes, 649
Hyphal chamber
glomalin in soilless pot culture, 567

Ice, soil
hydrostatics of frozen soil, 403
Interpolation
Canadian agricultural ecodistrict climate database, 373
Irrigation
agronomic application of manure and compost, 619

Land degradation
biowaste for soil erosion control, 103
Landform salinity
salinization of soils over oil sand spoil, 637
Landscape element/variability
greenhouse gas emission from a prairie pothole landscape, 243
Leaching
nitrate-N in the soil profile, 429
Lime
cement kiln dust surface application, 201
limestone, Mn and Zn affects cauliflower, 177
livestock manure improves acid and soil productivity, 685
paper mill and lime effects on soil P fractions, 467
paper mill biosolids in silage corn, 215
properties of clam processing wastes, 649

Macronutrient
limestone effect on soil elements, 655
Macropore flow
crack flow in Canadian soils, 129
Manure
agronomic application of manure and compost, 619
biowaste for soil erosion control, 103
effects of application timing and soil type on manure N fate, 55
green manure grown with phosphate rock on soil P, 257
livestock manure improves acid and soil productivity, 685
phosphorus accumulation in manured soils, 355
soil nutrients under fresh and composted manure, 341
Manure storage
emissions from liquid dairy manure, 229
modeling methane emissions from stored manure, 507
Map
soil organic C distribution maps, 75
Maxwell relations
hydrostatics of frozen soil, 403
Mechanistic model
modeling methane emissions from stored manure, 507
Medicago falcata, Medico sativa
(see Alfalfa)
Mehlich-3 extraction
limestone effect on soil elements, 655
Methane
greenhouse gas emission from a prairie pothole landscape, 243
modeling methane emissions from stored manure, 507
mudboil carbon fluxes, 441
Micromorphology
boreal grassland soils, northwestern Canada, 89
supraglaical tephra-derived soils, Yukon Territory, 611
Microorganism
biosolids and fertilizer impacts on tailing properties, 571
Micronutrient
limestone effect on soil elements, 655
Mine reclamation
biosolids and fertilizer impacts on tailing properties, 571
Mineral, soil, weathering of,
Ca nutrition in a boreal shield forest, 267
Mineralization
nitrogen availability from peat amendments, 165
soil nutrients under fresh and composted manure, 341
Model
calibration and validation of the Modified Universal Soil Loss Equation, 585
improving soil moisture prediction, 37
modeling methane emissions from stored manure, 507
modelling soil water content, 527
monthly ammonia emissions from fertilizers in Canada, 113
soil organic C distribution maps, 75
Modified Kelowna extraction
soil fertility of organically managed fields, 667
Modified Universal Soil Loss Equation
calibration and validation of the Modified Universal Soil Loss Equation, 585
Moisture, soil
improving soil moisture prediction, 37
Molybdenum
paper mill biosolids in silage corn, 215
Mulching, straw
biowaste for soil erosion control, 103

Net ecosystem exchange
mudboil carbon fluxes, 441
NEXAFS
nitrogen speciation in clay fractions, 309
Nitrate
fertilisation azotée du bleuet nain, 189
nitrate-N in the soil profile, 429
nutrient enrichmnent by cattle watering sites, 331
Nitrification
nitrogen availability from peat amendments, 165
Nitrogen
agronomic application of manure and compost, 619
C and N in forest plantations, 27
effects of application timing and soil type on manure N fate, 55
effects of controlled-release urea, 363

nitrate-N in the soil profile, 429
nitrogen availability from peat amendments, 165
nitrogen speciation in clay fractions, 309
soil nutrients under fresh and composted manure, 341
Nitrous oxide
greenhouse gas emission from a prairie pothole landscape, 243
Nitrous oxide flux
N_2O fluxes related to soil freeze and thaw periods, 409
Non-nutrient elements
limestone effect on soil elements, 655
Nonsorted cycle
mudboil carbon fluxes, 441
Northern Great Plains
soil response to transplanted alfalfa, 523
No-tillage
N_2O fluxes related to soil freeze and thaw periods, 409
soil organic carbon in Canada, 543
soil P availability and freeze/thaw cycles, 419
Nutrient analogs
limestone, Mn and Zn affects cauliflower, 177
Nutrient availability
limestone effect on soil elements, 655
Nutrient concentration and accumulation
cement kiln dust surface application, 201
Nutrient elements
limestone, Mn and Zn affects cauliflower, 177
Nutrient leaching
nutrient enrichmnent by cattle watering sites, 331
Nutrient uptake
livestock manure improves acid and soil productivity, 685

Oil sands reclamation
salinization of soils over oil sand spoil, 637
Olsen P
green manure grown with phosphate rock on soil P, 257
Optically stimulated luminescence dating
soil development rates in sandy temperate soils, 295
Organic agriculture
green manure grown with phosphate rock on soil P, 257
soil fertility of organically managed fields, 667
Organic carbon
organic carbon quality in two contrasting soils, 15
soil organic C distribution maps, 75
soil organic carbon in Canada, 543
tree influence on soil organic C and C:N, 559
Organic matter
biosolids and fertilizer impacts on tailing properties, 571
biowaste for soil erosion control, 103
organic carbon quality in two contrasting soils, 15
nitrogen speciation in clay fractions, 309
soil bacteria involved in residue decomposition, 289

Paper mill biosolids
paper mill and lime effects on soil P fractions, 467
paper mill biosolids in silage corn, 215
Particle size fractions
mineralization of active soil organic carbon, 551
Pasture
nutrient enrichmnent by cattle watering sites, 331
Pathogen
properties of clam processing wastes, 649
Patterned ground
mudboil carbon fluxes, 441
Peat substrates
aeration limitation in bark/peat growing media, 481
Perennial cropping
soil organic carbon in Canada, 543
pH, soil
limestone, Mn and Zn affects cauliflower, 177
Phosphate supply
green manure grown with phosphate rock on soil P, 257
Phosphorus
agronomic application of manure and compost, 619
paper mill and lime effects on soil P fractions, 467
phosphorus accumulation in manured soils, 355
soil nutrients under fresh and composted manure, 341
soil P availability and freeze/thaw cycles, 419
Porosity, air-filled
aeration limitation in bark/peat growing media, 481
oil physical properties and planted Scots pine, 451
Pot culture, soilless
glomalin in soilless pot culture, 567
Prairie Agrometeorological Model (PAMII)
modelling soil water content, 527
Prairie, Canadian
modelling soil water content, 527
soil response to transplanted alfalfa, 523
Prairie Pothole Region
greenhouse gas emission from a prairie pothole landscape, 243
Precipitation
Canadian agricultural ecodistrict climate database, 373
Preferential flow
crack flow in Canadian soils, 129
Pyrolysis-mass spectrometry
nitrogen speciation in clay fractions, 309

Q_{10} factor
estimation of daily soil CO_2 flux, 517

Radiation, solar
Canadian agricultural ecodistrict climate database, 373
Reclamation
nitrogen availability from peat amendments, 165
saline sites supporting boreal mixedwood forests, 1
Reforestation
soil physical properties and planted Scots pine, 451
Risk assessment/indicators
crack flow in Canadian soils, 129
Root chamber
glomalin in soilless pot culture, 567

Saline/sodic overburden
salinization of soils over oil sand spoil, 637
Salinity tolerance
saline sites supporting boreal mixedwood forests, 1
salinity tolerance of camelina compared with canola, 151
Salt diffusion/migration
salinization of soils over oil sand spoil, 637
Salt resistance
salinity tolerance of camelina compared with canola, 151
Scots pine
soil physical properties and planted Scots pine, 451
Sediment yield
calibration and validation of the Modified Universal Soil Loss Equation, 585
Sequential density fractionation
organic carbon quality in two contrasting soils, 15
Simultaneous heat and water model
improving soil moisture prediction, 37
Slope, steep
calibration and validation of the Modified Universal Soil Loss Equation, 585
Sodium adsorption ratio
saline sites supporting boreal mixedwood forests, 1
Solar radiation
Canadian agricultural ecodistrict climate database, 373
Spatial pattern
tree influence on soil organic C and C:N, 559
Straw mulching
biowaste for soil erosion control, 103
Strontium isotopes
Ca nutrition in a boreal shield forest, 267
Supraglacial debris
supraglaical tephra-derived soils, Yukon Territory, 611
Synchrotron
nitrogen speciation in clay fractions, 309

Temperature
Canadian agricultural ecodistrict climate database, 373
estimation of daily soil CO_2 flux, 517
Tephra
supraglaical tephra-derived soils, Yukon Territory, 611
Texture, soil
phosphorus accumulation in manured soils, 355
Thailand, northern
calibration and validation of the Modified Universal Soil Loss Equation, 585
Thermal analysis
organic carbon quality in two contrasting soils, 15
Tile drainage
survival of *E. coli* in agricultural soil, 495
Tillage
conventional, N_2O fluxes related to soil freeze and thaw periods, 409
practices, mineralization of active soil organic carbon, 551
systems, effects of controlled-release urea, 363
Tree influence
tree influence on soil organic C and C:N, 559
Tundra
mudboil carbon fluxes, 441

Unsaturated soils
anistropy of layered unsaturated soils, 319

Urea
effects of controlled-release urea, 363
monthly ammonia emissions from fertilizers in Canada, 113

Vaccinium angustifolium Ait. (voyez Bleuet)
Van Genuchten function site preparation
soil physical properties and planted Scots pine, 451
Vertical slope position
soil organic C distribution maps, 75
Volatilization
monthly ammonia emissions from fertilizers in Canada, 113
Volume change
soil volume changes, 389

Water
hydrostatics of frozen soil, 403
modelling soil water content, 527
soil physical properties and planted Scots pine, 451
Water fluxes
soil characteristics and groundwater, 597
Water-holding capacity
biosolids and fertilizer impacts on tailing properties, 571
Weathering, soil mineral
Ca nutrition in a boreal shield forest, 267
Wood ash
paper mill and lime effects on soil P fractions, 467

X-ray absorption
nitrogen speciation in clay fractions, 309

Zea mays L. (see Corn)
